

## PD85004

RF power transistor  
The LdmoST plastic family

### Features

- Excellent thermal stability
- Common source configuration
- Broadband performances  
 $P_{OUT} = 4\text{ W}$  with 17 dB gain @ 870 MHz
- Plastic package
- ESD protection
- Supplied in tape and reel
- In compliance with the 2002/95/EC european directive

### Description

The PD85004 is a common source N-channel, enhancement-mode lateral Field-Effect RF power transistor. It is designed for high gain, broad band commercial and industrial applications. It operates at 13.6 V in common source mode at frequencies of up to 1GHz.

PD85004's superior gain and efficiency makes it an ideal solution for mobile radio.

## 8 Package mechanical data

In order to meet environmental requirements, ST offers these devices in ECOPACK® packages. These packages have a Lead-free second level interconnect . The category of second level interconnect is marked on the package and on the inner box label, in compliance with JEDEC Standard JESD97. The maximum ratings related to soldering conditions are also marked on the inner box label. ECOPACK is an ST trademark. ECOPACK specifications are available at: [www.st.com](http://www.st.com)

Figure 15. Package dimensions

## 8.1 Thermal pad and via design

Thermal vias are required in the PCB layout to effectively conduct heat away from the package. The via pattern has been designed to address thermal, power dissipation and electrical requirements of the device.

The via pattern is based on thru-hole vias with 0.203mm to 0.330mm finished hole size on a 0.5mm to 1.2mm grid pattern with 0.025 plating on via walls. If micro vias are used in a design, it is suggested that the quantity of vias be increased by a 4:1 ratio to achieve similar results.

**Figure 16. Pad layout details**

## 8.2 Soldering profile

Figure 17 shows the recommended solder for devices that have Pb-free terminal plating and where a Pb-free solder is used.

**Figure 17. Recommended solder profile**

Figure 18 shows the recommended solder for devices with Pb-free terminal plating used with leaded solder, or for devices with leaded terminal plating used with a leaded solder.
